ACADEMIC PROJECTS

- ❖ **GlobeQuest—"Explore Beyond Borders"**
Developed *GlobeQuest*, a travel planning and exploration platform built with JavaScript, Node.js, Express, and MongoDB. Enabled users to discover destinations, browse curated itineraries, and plan trips with ease. Implemented secure user authentication, integrated interactive maps, and designed a responsive UI for an engaging and personalized travel experience.
- ❖ **TradeX—"Your Gateway to smarter Trading"**
Built a Zerodha-inspired stock trading platform using the MERN stack (MongoDB, Express.js, React, Node.js), implementing secure user authentication, live market data via APIs, watchlists, and portfolio tracking. Designed a responsive, intuitive UI to deliver a smooth and engaging trading experience.
- ❖ **AI Chatbot (ChatGPT Clone)**
Built an interactive ChatGPT-like chatbot using the OpenAI API that allows users to engage in natural language conversations. Implemented a responsive UI with real-time message rendering and error handling. Integrated secure API calls and managed user input history for enhanced experience.
Technologies: React, Node.js, OpenAI API, Express.js, CSS

ACHIEVEMENTS / HOBBIES
